SAHIL KUNDAL

AI Product Designer | Design Systems | Agentic UX | Enterprise UX
sahilkundal276@gmail.com | +91-6355753937 | Noida, Uttar Pradesh, India | Portfolio

PROFESSIONAL SUMMARY

AI Product Designer with 4+ years of experience designing and governing scalable design systems and AI-powered enterprise products across education, customer support and service-operations ecosystems. Proven ownership of end-to-end design systems — Figma libraries, reusable components, design tokens and interaction patterns — adopted by multiple development teams across mobile, web, desktop and interactive-display platforms. Experienced in AI product design, agentic UX (recommendations, human-in-the-loop approval, explainability) and AI-assisted design-to-development automation pipelines. Combines design-system governance (audits, design debt, documentation) with hands-on AI workflow design to improve consistency, scalability and design productivity.

CORE SKILLS & EXPERTISE

Design Systems: Design System Architecture · Design System Governance · Design System Adoption · Design Tokens · Component Libraries · Reusable Components · Design Patterns · Figma Libraries · Design Audits · Design Debt Management · UX/UI Guidelines · Design Documentation

AI Product Design: AI Product Design · AI Assistants · Agentic UX · Conversational UX · AI Workflows · Recommendation Engines · Human-in-the-Loop · AI-generated Content · Explainability · AI Interaction Patterns

Design Automation: AI-assisted Design Workflows · Design-to-Development Pipelines · UX Annotation Automation · Workflow/Automation Scripting · React · HTML/CSS · Developer Handoff

UX & Interaction: Enterprise UX · Interaction Design · Responsive Design · Multimodal Design (Mobile, Desktop/Web, IFPD) · Accessibility (WCAG) · Information Architecture · Rapid Prototyping · User Research · Usability Testing

Tools: Figma · FigJam · Adobe XD · Axure RP · Adobe Creative Suite · Cline · Cursor · Lovable · AI Agent Frameworks · Jira · Notion

PROFESSIONAL EXPERIENCE

Samsung R&D Institute India (SRID) Apr 2025 – Present

UX Designer — AI Product Design, Design Systems & Agentic UX (on-site at Samsung, via Adecco India) | UX Lead / Design Owner

AI Assistant for Education

- **UX Lead / Design Owner** for a 0→1 AI Assistant for Education spanning Interactive Flat Panel Displays (IFPDs), teacher, student and admin experiences across a multi-device ecosystem.
- **Designed AI-driven learning features** including AI-powered summarization, transcript generation, quiz generation and Live Caption, converting live classroom content into structured AI outputs.
- **Architected cross-device authentication and profile-management UX** for the Education Workspace, enabling seamless access across IFPD and classroom devices without dependency on personal laptops.
- **Partnered with Product Managers, Engineers and QA** to align product vision with technical feasibility and usability standards across the multi-platform ecosystem.

Customer Support & Agentic AI (VOC)

- **UX Lead / Design Owner** for AI-powered customer-support workflows spanning multiple internal portals used by ground and regional staff.
- **Designed an agentic AI experience** that recommends next-best actions to support agents across multiple portals — incorporating conversational interaction, AI-generated drafts, confidence indicators, explainability and mandatory human-in-the-loop approval/confirmation.
- **Automated a previously manual VOC review process** (formerly handled by regional staff) by designing AI-guided analysis and decisioning into the workflow, reducing manual processing.

Design Systems & Governance

- **Created and maintained multi-device design guidelines** for the AI Education and Customer Support products — each tailored to distinct interaction models — and contributed to the One UX admin-portal design guideline as part of the broader UX team.
- Conducted UX/UI audits and managed design debt across projects, translating findings into prioritized design recommendations.

Design Automation

- **Developed an AI-assisted UX Annotation Engine** that analyzes coded interfaces against UX specifications and auto-generates structured UX annotation documentation, streamlining design-to-development handoff.
- **Built automation tooling** for design-artifact generation (workflow/architecture diagrams from code) and Jira workflow automation (card creation, assignment, work-logging and status recommendations), reducing repetitive design operations.
- Used AI/agentic tools (Cline, Samsung internal AI agent) alongside React/HTML/CSS for AI-assisted UI implementation.

- **Legacy System Refactoring:** redesigned mobile alarm and system-alert architecture, resolving workflow and feedback-loop issues to prevent critical notification loss.

Onsitego (Onsite Electro Services Pvt. Ltd.) **Apr 2023 – Jan 2025**
Senior UX / Product Designer

- **Design System Ownership:** owned and maintained a centralized Figma design system adopted across 3 applications and 5–6 dashboards/portals by multiple development teams and the design team, establishing reusable components, interaction patterns, design tokens (color, typography, spacing, radius) and documented UX/UI guidelines.
- **Design System Evolution:** evolved the system from its legacy foundation to Design System 2.0, rebuilding documentation and the Figma library to support new product builds and progressive redesigns.
- **Governance & Audits:** conducted UX/UI and design-system audits to identify inconsistencies and design debt, translating findings into prioritized UX recommendations and redesign proposals.
- **Livtrack Application Optimization:** headed the systematic optimization and iteration of the Livtrack application based on data validation, reducing field-service completion loops by 15% and boosting net user satisfaction by 20%.
- **Enterprise Business Dashboards:** designed and deployed analytical command-center dashboards for complex operations, elevating daily active stakeholder dashboard usage by 30%.
- **Frictionless Service Operations:** streamlined the cross-channel customer service request and onboarding architecture, cutting customer inquiries by 10% while optimizing hardware activation modules.

Onsitego (Onsite Electro Services Pvt. Ltd.) **Apr 2022 – Apr 2023**
UX Designer

- **Product Redesign:** conceptualized a complete design overhaul of the legacy Livtrack mobile ecosystem and applied it across new builds — the consumer app, SalesPro app, website and reseller/enterprise dashboards — driving a 50% increase in active platform adoption and a 30% reduction in processing friction.
- **Operational Command Center:** standardized and built live performance-tracking architectures, driving a 40% jump in internal operating efficiency and shortening response delays by 25%.
- **CRM & Retail Ecosystem:** standardized multi-tenant B2B CRM dashboards and engagement engines, maximizing regional retailer platform interactions by 25% and contributing to a 15% increase in contract pipeline sales.

Onsitego (Onsite Electro Services Pvt. Ltd.) **Dec 2021 – Apr 2022**
UX Designer Intern

- Conducted focused user research and journey mapping with 99% accuracy in locating operational blockages, directly informing early design-system and product feature decisions.

EDUCATION

Indian Institute of Information Technology Vadodara
Bachelor of Technology (B.Tech) — Computer Science Engineering | 2018 – 2022

LICENSES & CERTIFICATIONS

UXED Practicing Program — Qualified UX Researcher & UX Designer (ID: UXED08032025SK)
Oct 2024 – Jan 2025
